

Annual Visit Appointment Checklist for Dogs 6 months and up.

Treatment	Why Is This Important?
Physical Exam	Required every 12 months, by state to treat or prescribe for your pet. A nose to tail exam is the best way to ensure your pet's health.
Rabies Vaccination	Required by state to be given by a licensed veterinarian. Rabies is fatal to pets and people.
Rabies Tag	Proof of rabies vaccination on years the vaccine is not given.
DHPP Vaccine	This is a core vaccine combo that protects against common, contagious, life-threatening diseases.
Leptospirosis Vaccine	This is a critical vaccine that protects against a serious disease that dogs can give to people. Wildlife spread it through urine.
Bordetella Vaccine	This social vaccine protects against common, contagious respiratory infections. Can be contracted via cough, in the air and sharing water with infected dog.
Canine Influenza Vaccine- 2 Strains	This social vaccine protects against a highly contagious, potentially fatal disease.
Intestinal Parasite Exam with Giardia test	Screens for intestinal parasites that can cause disease including severe diarrhea in people, and blindness in children.
Heartworm and Tick Disease Screening	Blood test for Heartworm and tick borne diseases.
Wellness Blood Tests	Detects early signs of organ dysfunction with a blood test. Many other health concerns can be caught early this way. Recommended to begin around 4 years old. Best if dog has fasted for 4-6 hours.
Urinalysis	Checks for infections, stones, cancer, and kidney disease. Recommended to begin testing at 4 years old.
Parasite Prevention	Annual injection, Proheart 12, HeartWorm
